

# What is Riipen?

Reduce Graduate Underemployment

Increase Employable Skills

Connect to Industry for Research or Teaching

Riipen is an experience platform that enables experiential learning inside classrooms, at scale. We match professors' learning objectives to industry partners that utilize those skills. This collaboration is designed by the professor, based on their needs. Riipen helps find the right industry partners for in-class assignments and facilitates that engagement.

Professor creates assignment

Student completes assignment

Professor gives student a grade

Professors and Students complete projects as normal...

Student Added to Company Talent Pool

Skills Added to Student Portfolio

While Riipen adds an experiential component to any course!

Riipen Matches Project to Company

Company Rates Student's Skills

Feedback Data Helps keep course content relevant to Job Market!

# Rippen helps...

## Students:

- Become more engaged in course content
- Build employable skills and professional networks
- Gain relevant experiences that lead to career opportunities

## Professors:

- Provide meaningful experiential learning opportunities
- Save time finding industry that matches learning objectives
- Demonstrate the relevance of course materials

## Institutions:

- Increase graduate employment numbers
- Show stakeholders commitment to career-readiness
- Improve connections with employers and alumni

## Companies:

- Improve employer brand
- Get accurate assessment of top talent, bypassing expensive and ineffective resume/interview process
